PREDICTIVE ANALYTICS
Workshop for Executives

JOIN US AT

Heartland
for Children

Improving the odds for kids in care is a central priority for community-based care agencies. MindShare Predictive Analytics make it possible to very accurately predict the likelihood of a child in care to experience re-abuse, failed re-unification or delayed permanency.

So, how do you put the predictions into practice? What are the challenges faced in doing so? And what are the people-centric practices that surround them? How do we stay or change the course in the best interest of a child? How do we adapt our organizational processes to incorporate these ground-breaking advancements?

Don't miss this collaborative, in-depth workshop focused on the application of MindShare Predictive Analytics to Florida Safe Families Network.

Placement Moves per 1,000 Days in Care

Track the rate at which children change placements while in foster care during the cohort selection period with this new dashboard. Select the fiscal year, the fiscal month, and enter a goal and see a display, by agency, of children's:

Placement Moves | Days in Foster Care | Rate of Placement Moves per 1,000 | Number of Moves per 1,000 before Threshold of 10 is Breached.

Dental Services within Seven Months

Track children in foster care, ages 3 and up, who have received dental services within the last seven months. Select the fiscal year, the fiscal month, and enter a goal. This dashboard displays both the current percentage and the number of children who require dental services in order to meet the goal by agency. Results display:

Agency | Children 3+ in Foster Care | Children Received Services in Prior 7 Months | Percentage | Required to Meet Goal of 98.3%

FS106A Maltreatment

Percent of children who were not subjects of reports of verified maltreatment.

M6 No Re-Entry / Permanency

Enter a date range to see, by agency, the number of children entering foster care and achieving permanency within 12 months of entry, and of those, those that did not have a subsequent re-entry, along with the percentage displayed by agency as follows:

Children Entering Foster Care & Achieving Permanency with 12 Months | Those That Did Not Have a Subsequent Re-Entry | Percent.

M10 Exit with Education

By agency display with drill-downs show the (percent of) young adults who aged out of foster care who have completed or are enrolled in secondary education, vocational training, and/or adult education.

Children Who Aged Out of Foster Care & Turned 18 Between (Selected Date Range) | Completed or Were Enrolled in Secondary Education, Vocational Training or Adult Education | Percent.

Worker Turnover Rates

Brought to us by the requirements of **OurKids**, is a featured dashboard showing worker turnover. The M20 Active Client List now shows a breakout of Percent Turnover monthly, fiscal year and a rolling 12 months. The detail also includes the turnover rates per agency.

Permanency Tracking

Brought to us by the requirements of **Sarasota YMCA (Safe Children Coalition)** is a series of new dashboards for Permanency Tracking. These dashboards provide high impact visibility for tracking a child's Length of Stay in various settings. Each dashboard provides certain thresholds to provide the case management staff the ability to keep a pulse on children who may require increased oversight to avoid delayed permanency.

MOBILE APP RELEASES

CASEWORKER IOS 1.4

Easier Navigation
